Vision

The aim for the automation provided is to maintain focus on gameplay, facilitate setting up different game modes, whilst streamlining game turns, exploration, and combat.

In TTS terminology, avoid the need for excessive panning, automate randomness, drawing from decks, and rolling dice whilst keeping focus on the map and hero board.

Please use Dragons Down Discord server for feedback.

Acknowledgements

This mod is a culmination of effort by several individuals:

Scott DeMers and Samuel DeMers for pouring their heart and soul designing this sublime game and for generously providing all the art assets for the mod.

Angelus novus for creating the Dragons Down mod

Shyamasundara for his hero setup scripts

Kirk Fogg for developing the Open Realm map creation automation.

George V for developing setup automation and writing this guide

Setting up the game

The Setup Menu automates setting up a new game.

Quick Start

Unless going for a specific combination of Terrain packs and other components, the quickest path to start playing is pressing the [3 Random Packs] button to randomly setup 3 Terrain packs.

You can then press any of the [Classes] button(s) and add any other content such as Natives. See Terrain Packs below for more details.

Finally, press one of the map mode buttons to finish setting up.

Map Modes

Pressing one of the map mode buttons will setup the map accordingly and shuffle eligible components ending the setup process and hiding the Setup Menu.

- [Manual Map] button will not perform any specific map setup. Use this mode to manually setup the map in any mode following the rules. Place any remaining civilization map tiles in the map tiles bag before starting to play. This mode is useful for Scenarios that do not use Open Realm or Exploration mode.
- [Open Realm] button will automatically setup the map in Open Realm mode using the Random Map building Technique. All tiles will be setup with a random side up.

A mini map menu will also be setup in the upper centre of the table. When the map has finished setting up you can either press the [Rebuild Map] button to instantly create a new map or press the [Accept Map] button to complete the process. Civilisation locations will be setup, and the mini map menu will hide.

- [Exploration] button will setup a random Civilisation map tile in the centre of the table or setup the Port towards the west if Riverlands are in play.

Exploration roundels will be setup on the table. Use the [Explore] button to automatically draw a map tile with a random side up at the roundel's spot. Manually rotate the tile using [Q] and [E] keys and then lock the tile in place with [L] key.

When done press the [Accept] button to hide the Exploration roundel. If the Map Tile cannot be placed in this spot use the [Fail] button to automatically place the drawn Map Tile in the Failed Exploration bag. The Exploration roundel will revert to the [Explore] button.

If Riverlands are in play you must first setup the river. Starting from the spot next to the water side of the Port tile use the [River] button to draw the next river map tile rotating the tile so the water edges match. The last River tile will be the Headlands. When the river is setup the remaining Exploration buttons will switch to showing [Explore] buttons.

At any point during the game, you can hide or show the Exploration Buttons via the Exploration mini menu near the Map Tile bags

When the standard map tile bag is empty, map tiles will be drawn in FIFO order from the Failed Exploration bag. The Exploration buttons will automatically hide upon pressing Explore when no more map tiles remain in both bags.

Terrain packs

You can setup a specific Terrain pack using the corresponding terrain pack button. You can also use the [3 Random Packs] button and then select more terrain packs. Terrain pack setup should occur before selecting a Map mode as this will end the setup process and hide the Setup Menu.

Use an [All] button to setup all the components for the depicted module.

Use a [Classes] button to setup Lineages, Classes, and other non-terrain-pack specific components for the corresponding module if no terrain packs have been setup from this module. You can use the [Classes] buttons to customise the Class pool for use with Random Hero selection.

Co-op Mode

Press [Co-op Mode] button to enable summoning buttons on Map Tiles when playing with co-op rules.

Terrain Pack Setup Cards

Use the [Toggle Setup Cards] button to alternate between sides of the setup Cards. Setup Cards that only have merchants (i.e. Special Merchants) are randomised when components are shuffled.

Setting up a Hero

Player colour

You must first select a player colour using TTS menu as depicted and then click on one of the six coloured circles places around the table: Green, Red, Blue, Yellow, Pink, and Purple.

Random Hero

Use the [Random Hero] button to randomly create a hero. The Hero mat will be setup for your player colour together with a Lineage and Class card and matching cubes. You can then adjust magic cubes and select spells (see Spells and Magic cubes below). You can use the [Hide] button to remove the random hero pawn.

Lineage and Class

Use the [Select] buttons on Lineage and Class cards to create your hero. You can flip a Lineage or Class card with the [F] key before deciding which side to choose. The Hero mat will be automatically setup and the cards placed on the mat together with any equipment and cubes. See also Spells and Magic Cubes.

When selecting a **Gnome** Lineage, 3 items will be dealt on the Lineage card. Right-click on unwanted Items and select [Discard] to discard to the Items deck. The deck will be automatically reshuffled. If an Item is a Horse you cannot keep it. Right-click on the Horse and select [Replace] to draw another item from the deck and return the Horse.

Spells and Magic Cubes

Look for any messages prompting for selecting Spells and magical cubes.

Use the [Select] button on Starting Spell cards to select the desired spell as per the rules. Use the [Select] button on Starting Spell cards to select the desired spell as per the rules. The Spell card will be placed below your Hero Mat.

Use the [Get] button on the mini cube bags to select cubes for Elves or for classes that have any-colour cubes. Also, for classes that have 50/50 cubes, choose one of the two magical cubes provided and delete the other (right-click/Delete or [Delete] key).

Counters

You can track LPs, Fame and Gold.

Left/Right click on number add or subtract 1. Right click on edge of counter for the context menu. Hover on counter number and type desired number. The Gold counter is automatically set to the right amount during Class Selection. Some Classes start with 0 gold.

Dice

To facilitate dice rolling and keep things tidy you can use the dice button roundels. Each roundel has 3 buttons for rolling both dice, or each single die. You can also use the [Curse] button to roll for a Curse.

Taking Turns

The Turn Order Bag is used for randomly determining player order per turn, turn count and optionally rolling the summoning dice. Each selected Hero will have its Targeting Token placed inside the Turn Order Bag. The tooltip states the number of contained tokens.

After completing the Setup and Hero Selection you can select the desired mode for handling Summoning dice rolls.

Manual Roll

Provides core functionality for randomising Player Turn Order and for incrementing Turn Counter.

- [New Turn] button randomly draws targeting tokens, broadcasts the Turn number and turn order, and increments the Turn Counter. [End Turn] button becomes visible.
- [End Turn] button retrieves the targeting tokens, and the [New Turn] button becomes visible ready for the next turn.
Merchant Missions will be replenished if necessary, and a message will appear for any such Merchant.
Status cubes in the Alert, Hide, and Sneak/Make Noise slots will be moved to the side of the Hero board(s).
Tip: This is a good time to save your game.

Auto Roll

Provides additional automation for rolling the Summoning dice at the end of each Action Phase. After the [New Turn] button [Summon] roll and [Skip Roll] buttons are shown instead.

- [Summon] roll button rolls all visible Summoning dice and broadcasts the results. The effects of each summoning die are shown on screen. Tip: You can see all such messages in the bottom left chat window. Make Noise and [End Turn] buttons are shown.
- [Skip Roll] shows the Make Noise and [End Turn] buttons, without rolling the summoning die. Use this button to move to the next step when you have setup a summoning die to a pre-determined face (i.e. Foresight)

- [Make Noise] rolls all visible Summoning dice and broadcasts the results. Use when you have taken a Make Noise action on a specific clearing

d6

A d6 is always rolled together with the Summoning dice for supporting **Roaming Monsters**, **Roaming Natives**, and **Earned Rewards** optional rules.

Exploring and Summoning

As you move around and explore the map you will come across buttons that help setup and draw components so you can maintain focus on gameplay. In most cases, buttons offering functionality based on Optional Rules will have a grey font colour

Decals

Use the Decal tool [F6] and select the circular decal with your player colour to stamp a discovered Treasure Site or Hidden Path. The decal tool stamps the surface of a Map Tile so it can be used for marking discovered Hidden Paths on both sides. You might want to use the decal too to stamp Minor Discovery, Item, and Treasure wilderness tokens with the player colour that claimed the token.

Map tiles buttons

- [C] buttons appear in Civilisation map tiles. Use to setup the Civilization Location and the Native group in a random clearing on the tile. When using Open Realm map mode, the [C] buttons are not needed as the Civilization location will be automatically setup after pressing the [Accept Map] button.
- [W] buttons appear on Wilderness map tiles. Press when entering a map tile for the first time to draw a random Wilderness Token. The Earned Rewards optional rule is always in effect, and some types of wilderness tokens will be placed on a random clearing. If you do not wish to play with the optional rule, acquire the rewards immediately using the button on the wilderness token
- [M] buttons appear in Wilderness map tiles. Press each turn after rolling the Summoning Dice to summon any eligible Wandering and/or Local Monsters to the map tile. The Roaming Monsters optional rule is always in effect and Wandering monsters may appear in a different clearing than the Hero. If you do not wish to play with the optional rule, manually place any Wandering Monsters to the Hero clearing.
- When co-op mode is enabled, two [1] buttons will be visible next to each summoning symbol. Press each button once to summon one Wandering or Local monster each time additional monsters must be summoned as per the number of Heroes in the Clearing.

Civilisation Locations buttons

- [2] buttons appear on Civilisation Locations. Press to draw 2 Civilisation Tokens.
- [N] buttons appear on a Civilisation Locations when playing with Natives. Press each turn after rolling the Summoning Dice to summon any eligible Natives to the map tile. The Roaming Natives optional rule is always in effect, and Natives may appear in a different clearing than the one containing the Civilisation Location when first entering the map tile. Natives already on the map tile will move to the Civilisation Location clearing if subsequently summoned. If you do not wish to use the optional rule, manually place all summoned Natives to the Civilisation Location clearing.

Civilisation tokens buttons

- [S] buttons are used to setup the card stacks for the corresponding merchant.

Wilderness tokens buttons

- [C] buttons can also appear on a wilderness token if Natives are in play. They function the same as the map tile buttons
- [W] buttons can also appear on a wilderness token for Special Locations (i.e. Forgotten city) or for Civilisation Locations such as Campfire when Natives module is in play. Use the button to draw any additional wilderness tokens.
- [S] buttons can be used on Item and Treasure tokens to draw the relevant card when claimed.
- [r] buttons can be used to return a Wilderness token to its bag as per the Special Locations Wilderness Tokens rule (see Eastern Reaches rulebook), when using the Explorer's Class ability, or when the Scout Spell is active.

Treasure Sites buttons

- [S] buttons are used to setup the card stacks for the corresponding treasure site.
- [G] buttons appear on Treasure sites. Press each turn after rolling the Summoning Dice to summon Guardian monster to the Site clearing.
- [Spell] button is used to draw a Spell card when using the Magic Sites optional rule.

Monster and Natives chips buttons

- [r] buttons can be used to Return a monster or native chip back to its bag or stack.
Left-click on an [r] button to return a chip when a Return result is shown on a summoning die.
Right-click on an [r] button to return a chip regardless of the summoning dice result when you need to return Natives due to Monsters appearing in their clearing or to return killed monsters from a Hero board when Endless Monsters rule is in play.
Natives that start on the map such as Knights, have an [r] button with a grey background as a reminder that they only Return due to Monsters appearing in their Civilisation Location.

Combat

PvP

When using PvP rules you can use the PvP bag below the Hero mat to Place the PvP Colour Screen when choosing tactics during PvP combat, so they are visible only to you. When all players have finished placing cubes, all players Recall their Colour Screen and attacks are resolved.

Battle mat

You can place the Battle mat found in the Battle Mat bag below the Hero mat for streamlining Monsters Tactics and tracking Combat rounds. Place Monsters on the battle mat snap points name face up. Up to 8 chips can be placed on the mat.

- [Start] combat button sets the Round Counter to 1 and shows the [Tactics] button. On Round 1 a reminder for Closing The Distance optional rule will be shown.
- [Tactics] button automatically resolves Monster tactics and then shows [Next Turn] button. Tip: Do not place chips that do not change tactics on the battle mat (hired natives, controlled monsters etc.)

- [Toggle PvP] button will deploy/retract the PvP screen to facilitate PvP combat. Each player deploys the PvP screen to hide all cards and cubes on their Hero board from other players during Hero Tactics step. When all players have selected their tactics, all players retract their PvP screens and resolve the next combat step.
- [Wound] button provides a red cube for marking wounds on enemies or equipped Horses. An initial value of [-1] is shown. Left(right)-click to increase(decrease) the value between -1 and -3.
- [Next Turn] increments the Round Counter and shows the [Tactics] button again.
- Use the [End Combat] button when Combat ends to set the battle mat to its initial state. This will also place and sort all healthy cubes placed in Lineage, Class, Equipment, Spells, and Horse cards into the Healthy box.

Outlaw tokens

- Use the [Outlaw] button found on the Hires and Kills card to draw an Outlaw token next to the card. Tip: Outlaw tokens have a 'x2' flip side that counts as two tokens. Use the [F] key to flip the token.

Treasures, Spells, Missions, Titles, and Legends

All cards have a Discard context menu (right-click) item that can be used to move cards to the Discard snap point on the top left corner, when removed from the game (i.e. when claiming Native Titles, destroyed armour, used Potions, etc.).

The card must be unlocked before it can be discarded. Use the [L] key to toggle lock status

Treasure cards buttons

- [Fill] button draws additional cards required and places them on top of the treasure card (i.e. Spell Books and Scrolls)
- [Replace] button draws a new treasure card of the same type on top of the treasure card (i.e. Enchanted Treasures, Cursed Treasures). The replaced card will be moved to the Discard snap point. If the Replaced treasure was an Enchanted Treasure a matching magic cube will be drawn nearby.
- A [token] button appears on Red Backpack Treasures. Use to draw a red backpack token that has its tooltip set to a short description of the host treasure.

Spell cards buttons

- Elemental Spell's [Summon] button can be used to draw a random Elemental.
- Several other Spells have mini buttons to draw cubes used as reminders of the Spell's effects. These vary for each Spell.

Mission cards buttons

Each Mission card has some of the buttons explained below based on its type. Certain Missions award an Attribute token when completed. In that case a matching attribute token will be drawn upon completion. The term Discard has multiple applications for a Mission card depending on context. Specific buttons are available for each case: [Discard], [Replace], [Abandon], [Steal].

- [Complete] button hides all other buttons and adds a tooltip with the player completing the Mission. Completing a Mission will also draw any additional cards and/or tokens mentioned in the Mission's textual description. The standard Mission rewards (LP/Fame/Gold/Mission dice) will have to be acquired manually by

manipulating the relevant counters or rolling the necessary dice. Tip: Ensure the player that completed the Mission is the active player when using the button.

- [Discard] button is shown on certain missions for discarding when a single terrain pack is in play, or the target is a Native group as it may not be possible for the group to be summoned when certain Civilisation Locations are not in play. On the contrary, Missions requiring delivery to the next Civilisation Location in alphabetical order will display the Destination when hovering over the card. All buttons on the Mission are removed, and the Mission is placed on the Discard snap point on the top left corner of the table close to the attribute token bags.
- [Replace] button is used with certain Missions that must be replaced when drawn from the deck of the target merchant. The card is moved back to the Mission deck, and the deck is shuffled. This is in accordance with the Mission Cycling optional rule. Tip: if you do not want to use the optional rule, manually create a discard pile for such Missions and shuffle [R] and then flip [F] to prepare a new Mission deck.
- [Abandon] button draws a new Mission, moves the abandoned Mission back to the Mission deck and shuffles the deck. This is in accordance with the Mission Cycling optional rule.
- [Steal] button removes all buttons from the card, updates tooltip with the active player's name when clicking the button and then draws any additional cards and/or tokens mentioned in the Mission's textual description relevant to stealing.

Title Cards buttons

Use the [Cube] button on a Title card to draw a pink cube on the card when completing a Title. For Title cards that show a side with a limited number of Titles the button will be removed after the limit is reached.

Legendary Treasure cards buttons

Each Legendary Treasure card has a [Token] button that draws the matching Legendary Treasure token near the card. In addition, most Legendary Treasure cards have specialised buttons that appear after the [Token] button is pressed as detailed in the below list:

- Treacherous Ledge, Collapsed Passage, and Cavernous Pit: No setup necessary. Press the [1] button to draw the first Treasure when successful. A [2] button will then appear. Press the [2] button to draw the second Treasure. The button will then be removed. You can discard the card and the token.
- Grave of the Champion, and Spellcasters Simulacrum: Press [1] button to setup the Treasures stack next to this card. A new [1] button will appear. Press for receiving a Curse if you roll 5 on a Loot attempt. When no more treasures remain, you can discard the card and the token.
- Riddle of the Imp, and Statue of the Templar: No setup necessary. According to the Haggle roll result use the corresponding button: [1] to summon the Imp/Statue near the card. [2] to roll for Curse. [3] to draw any fixed colour magic cubes. [4] to summon the Imp/Templar and remove all the buttons. When no buttons are visible you can discard the card and the token.
- Arcanis Enigma: No setup necessary. According to the Haggle roll result use the corresponding button: [1] to roll for Curse. [2] to draw the magic cubes. [3] to draw the Legendary Treasure and remove all the buttons. When no buttons are visible you can discard the card and the token.
- Adventurer's Corpse: Use the [1] button to roll for Curse and to draw the Legendary Treasures shown near the card. You can then shuffle the Treasure together with the Deep Treasure in the parent Site. When no buttons are visible you can discard the card and the token.

- **Infernal Glyphs:** According to the Learn Spells roll result use the corresponding button: [1] to roll both numbered summoning dice. [2] to roll for Curse. [3] to draw the magic cubes. [4] to draw 3 Spell cards next to this card. Learn on spell if able and manually return the remaining Spell cards to the Spell deck and shuffle the deck. This card is never discarded.
- **Lost Captain's Locker:** Use the [Fill] button to draw the Treasure to a stack next to the card.
- **Lamp of the Djinni:** According to the Haggle roll result use the corresponding button: [1] to roll for Curse. [2] to show a message for enchanting the Mar Tile with 2 magical cubes of your choice. [3] to draw The Lamp card. Then use the [1] button on The Lamp to draw a stack of 7 Spells.

Optional Rules

Natives Possessions

Use the [Setup] button next to each Native Group's Title card to setup the group's possessions when using the Natives Possessions optional rule.
